

# ANNE A. NICHOLAS, D.D.S. SCOTT R. ADISHIAN, D.D.S.

*A team of specialists under one roof for all your dental needs*

BY TRUDIE MITSCHANG

It's been said the eyes are the windows to the soul. What you may not know is that your teeth are a reflection of your overall health. That's why finding the right dentist is so important.

Dr. Anne Nicholas has offices in Palm Desert and Palm Springs; and her areas of expertise include periodontics, dental implants, and cosmetic and restorative dentistry. After dental school she completed a three-year post-doctoral program in periodontics and dental implants at Loma Linda University in 1992. In the process of her advanced studies, Dr. Nicholas also completed a one-year residency at the Misch Implant

Institute. Dr. Nicholas runs a professional, state-of-the-art practice that provides laser teeth whitening, patient-friendly educational software, oral cancer screening, a 42-inch plasma screen mounted in the ceiling for patients to view movies during long dental procedures, and digital X-rays, which use 90 percent less radiation than tradition X-rays.

"I am proud to have served patients in our community for over 16 years," says Dr. Nicholas. "Through continuing education and state-of-the-art equipment, we are able to offer patients and their families the highest level of care in a friendly and relaxed environment."

## Convenient, comprehensive care

In today's busy world, it's hard to find the time to devote as much attention to dental care as we should. Dr. Nicholas understands. In a quest to find a more complete way of caring for her patients, her practice has evolved into a multispecialty dental group that encompasses most of the specialties in dentistry, including a special room designated for education and training.

As a periodontist, Dr. Nicholas specializes in the prevention, diagnosis, and treatment of periodontal disease and the placement of dental implants. Dr. Nicholas is familiar with the latest techniques for diagnosing and treating periodontal disease and can perform cosmetic periodontal procedures to help you achieve the healthy beautiful smile you always wanted.

Dr. Nicholas' colleague, Dr. Scott Adishian, is a certified prosthodontist who has undergone intensive training in restorative dentistry and is skilled in all aspects of oral function and health. Whether a patient is having trouble with the alignment of their bite, in need of tooth replacement, or simply desiring a more cosmetically beautiful smile, Dr. Adishian can quickly assess any problem and provide a solution. With more than 25 years of teaching experience, Dr. Adishian has coordinated all aspects of patient care and provides a comprehensive treatment plan for all of your dental needs.

*“Our goal is to partner with our patients to achieve their treatment goals and give them a beautiful and healthy smile that will last a lifetime.”*

#### **Advanced care, with your comfort in mind**

If you've lost one or more teeth, you know how embarrassing it can be. Thanks to modern technology, Dr. Nicholas can help you regain a strong, healthy bite, without the inconvenience of bridges or dentures — often in as little as one or two office visits. Using dental implants that are strong, beautiful, and completely natural-looking, Dr. Nicholas can restore your smile and your self-confidence. You'll be amazed by the possibilities.

The two primary goals that guide all activities at Dr. Nicholas' office are to provide the highest level of patient care that modern dentistry allows and to provide treatment that allows for the highest level of comfort, before, during, and after your procedure. Dr. Nicholas also offers her patients the option of being sedated during treatment so that they have little or no memory of the surgery. The caring and friendly relationship she and her staff have with patients makes them feel at home, and their appreciation for the level of care she provides is her highest compliment.

Whether you are looking for an exceptional and knowledgeable general dentist, a talented cosmetic, specialist for a smile
